The power of bluetooth mesh

A bluetooth mesh network consists of a hub and one or more bluetooth mesh devices which pick up and extend the signal as long as they are within range of each other (max. 15 m). Thus greatly improving the range outside your home.

All it requires is having the calexLINK hub set-up within your local WIFI (2.4 GHz) network. The calexLINK connects WIFI to Bluetooth.

The calexLINK is sold separately.

All-in-one App

The 'calexLINK' is fully intergrated with the Calex Smart App, easy to install in 3 steps and works with Amazon Alexa, Google Home and Apple's Siri Shortcuts.

Download the app

Scan the qr-code or search for Calex Smart in the store to download the free app for smartphones and tablets to control Calex Smart products.

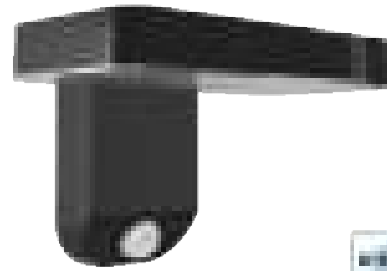

~ max. 15 m
